 [Portfolio](#)

Summary

UI/UX Designer with experience designing and building intuitive, user-centered web, mobile and SaaS applications. Skilled in translating business requirements into seamless user experiences, creating scalable design systems, and collaborating closely with product managers and developers to deliver high-quality digital products.

Work Experience

Technical Consultant / UI/UX Developer – [Azentio](#)

Mar 2026 – Present

- Led the design and development of intuitive, user-centered interfaces for enterprise applications, ensuring optimal usability, accessibility, and responsive performance.
- Collaborated with cross-functional teams, stakeholders, and clients to analyze business requirements and translate them into scalable UI/UX solutions.
- Designed wireframes, interactive prototypes, user journeys, and high-fidelity interfaces aligned with business objectives and modern UX standards.
- Customized and enhanced enterprise software platforms to improve user experience, workflow efficiency, and overall customer satisfaction.
- Conducted usability evaluations, UI audits, and continuous interface optimization to enhance product adoption and engagement.
- Worked closely with development teams to ensure accurate implementation of design systems, frontend components, and technical specifications.
- Provided technical consultation and solution support for client implementations, UI enhancements, and digital transformation initiatives.
- Maintained design consistency and scalability through reusable components, design guidelines, and adherence to best practices in UI/UX development.

UI/UX Designer [Webalo, Inc](#)

Jan 2023 – Feb 2026

- Collaborate with product managers, engineers, and customer support teams to translate business requirements into scalable web and mobile design solutions.
- Conduct research on design best practices to enhance user experience and inform design decisions.
- Design and validate mockups and prototypes using Figma, Figma Make, and other tools, collaborating with stakeholders and incorporating feedback to refine features.
- Improve usability and functionality of the web and mobile applications used by large organizations.
- Implement new designs in coordination with the engineering team and supported developer handoff using Figma Inspect.
- Resolve bugs and design inconsistencies reported by the QA team to ensure high-quality releases.
- Participate in regular design standups and coordinated with international teams across multiple time zones.
- Manage new feature requests and design modifications, maintaining consistency with the design system.

UI/UX Designer Freelance

Jan 2021 – Dec 2022

- Delivered UI/UX solutions for web and mobile applications for startups.
- Conducted user research, competitor analysis, and usability reviews.
- Designed responsive user interfaces and interactive prototypes.
